MARKET SHOWS

Bears Not Having Things Their Own Way in This Country or Abroad.

SLUMP LATE IN SESSION

AT CLOSE DAY'S NET CHANGES WERE TRIVIAL.

New York. Feb. 11.-The dull strength in today's market was ascribed in large part foreign influences and was an echo of Am he rout undergone by the bear element Am the speculation on the London stock Am. The situation abroad has been

market. The situation abroad has been eleared up materially by the international political adjustments that have been going on and which remove a weight of aperehension that has borne on the financial markets for many months.

The easing of the London money market also gives a fresh start to the investment demand, which has begun to show signs of being glutted by the large new issues of capital recently placed in the market. The closing up of short accounts made a buoyant stock market in London yesterday and today, the rebound in British consois reaching more than a full point in that time, although some eleaction occurred before today's market glosed. London was a buyer of stocks here on a considerable scale and this was shere on a considerable scale and this was an important factor in the early advance

piosed. London was a buyer of stocks here on a considerable scale and this was an important factor in the early advance in prices. It was also effective as a senjimental factor, and prompted some buying by local operators, especially among the shorts, who were disinclined to leave themselves uncovered over the three days will be closed after today.

Some part of the buying here was supposed to be prompted by the action of the California legislature in reconsidering and defeating the bill to segregate Japanese children in the public schools, although the discussion of our Japanese relations had lost its influence as a stock market factor for several days. Union Pacific moved up with its usual strong sympathetic effect on the whole list. The stock was favorably influenced by the official financial statement which was presented by the stock exchange in connection with the application to list new refunding bonds.

Admission of directors representing new control in the Chesapeake & Ohio board was made the occasion for another dem-onstration of strength in that stock. The whole of the southern group of railroad stocks was marked up briskly without any special explanation. There was a notice-able selection of low grade bonds also for active market movements, especially among those which have been deposited

active market movements, especially among those which have been deposited with protective committees in the course of reorganization plans.

Estimates of the currency movement were for only part of the week, but they indicated some loss of cash by the banks, as the withdrawal of deposits by the linited States treasury and the shipments of gold to South America were not offset.

STRICTLY

by the inflow of cash from the interior. The money market was not perceptibly affected by this showing and it was supposed that some large loans are being taken over from the banks by the trust companies. Sterling exchange was inclined to move up in spite of the buying of the stocks here for London account, January exports of domestic produce fell \$40.000,000 in value below the January exports of last year, but that month last year marked an absolute record in merchandise exports and was the culmination of the rush to market merchandise abroad for the purpose of procuring gold to relieve the after panic money conditions in New York. The stock market sank back into lethargy in the late dealings and the day's changes proved trivial in most cases. Honds were firm. Total sales, par value, \$7,630,000.

REVIEW OF TRADE.

Commercial Reports Declare the Situation Generally Quiet.

New York, Feb. 11.—Bradstreet's this reek will say: Unsettled, stormy weather has accen-Unsettled, stormy weather has accentuated the quiet prevailing in general trade and the situation as a whole is rather irregular. The first of the spring season's buyers' excursions are, however, attracting merchants to the leading marrian tracting merchants to the leading marrian characterizes dealings, the feeling is still one of optimism as to the future. In the industries operations as a whole are still below the normal.

Best reports come from the textile trades, particularly cotton and woolen dress goods lines. The metal and coal trades are rather conspicuous for the dullness of demand and the continuance in

trades are rather conspicuous for the dullness of demand and the continuance in the former industry of output at a reflect the irregularities due to weather or the reduced purchasing power of the country and are still only about fair.

Business failures in the United States for the week ending Feb. 10 were 211 against 286 last week, 326 in the like week of 1908, 204 in 1907, 208 in 1906 and 243 in 1905.
